New for the Medical Device Manufacturing Industry

M-100L-M Laser Marking System

Introduction

Tri-Star Technologies, a leader in innovative solutions for the medical device manufacturing industry presents a revolutionary new Laser Marking System. The M100L-M is a fully automatic, computer controlled, high speed, UV laser marker. It has the ability to mark sensitive medical devices without causing ANY damage. The system offers tamper proof marking capability, both on and below the surface of various medical devices.
