To whom it may concern,

Schleuniger has worked with Tri-Star Technologies to integrate their laser marker with our wire cutting and stripping machines and our Cayman Wire List Processing software. Schleuniger sells the fully integrated system as a turnkey package to end customers. In all the years we have working with Tri-Star Technologies, we have found them to be responsive and willing to go the extra mile. We have also found their products to be very reliable. We highly recommend Tri-Star Technologies.

Sincerely,

Peter Doyon  
Vice President of Product Management
